

ISMAEL TAVARES RODINO

Senior Software Engineer

Porto Alegre, Brazil | +55 51 98504-7712 | Email | LinkedIn | GitHub | Portfolio

Summary

Senior Software Engineer with 5+ years of experience building production applications across frontend, backend, cloud, and AI-enabled systems. Strong experience with TypeScript, React, Next.js, Node.js, AWS, PostgreSQL, and Redis. Led frontend modernization projects, built full-stack products from scratch, and delivered measurable performance improvements including a 30% reduction in search API requests and a 55% reduction in main-thread execution time.

Technical Skills

Frontend: TypeScript, React, Next.js, React Native, SSR/SSG, Sanity CMS
Backend & Cloud: Node.js, REST APIs, GraphQL, PostgreSQL, MongoDB, Redis, Supabase, Firebase, Prisma, AWS, Docker
AI & Engineering: LLMs, RAG, AI Agents, MCP, Tool Calling, PostGIS, CI/CD, Automated Testing

Experience

Bucksense 07/2024 – 07/2026
Software Engineer USA – Remote

- Reduced Algolia API requests by approximately 30% by eliminating redundant queries and introducing Redis caching for cruise search results, lowering infrastructure usage and improving search responsiveness.
- Increased Lighthouse performance score by approximately 20 points through bundle optimization, responsive image delivery, lazy loading, rendering improvements, and caching.
- Reduced a key page bundle from 1.62 MB to 781 KB and cut main-thread execution time by approximately 55%, from 10.4s to 4.7s.

Gudi Marketplace 02/2025 – Present
Founder & Software Engineer Brazil – Remote

- Architected and built a full-stack marketplace from scratch using React Native, Next.js, Supabase, PostgreSQL, and TypeScript.
- Designed payment orchestration supporting split payments, seller payouts, virtual wallet credits, and platform revenue distribution.
- Designed scalable data architecture with Supabase RLS and PostGIS, supporting multiple user roles, location-based discovery, and expansion across cities.

Quattrus 01/2024 – 08/2024
Software Engineer Porto Alegre, Brazil

- Led the migration of enterprise applications from ExtJS to Next.js, defining the frontend architecture and migration strategy.
- Built a private npm package for reusable UI components shared across migrated applications.

Alex Rohleder LTDA 03/2023 – 01/2024
Contractor Software Engineer Norway – Remote

- Migrated a CRA application to Next.js using a hybrid rendering architecture, consolidating duplicated application logic and improving maintainability.

Speedcast 02/2022 – 04/2023
Contractor Software Engineer USA – Remote

- Built real-time monitoring and data-visualization features for a satellite network platform, including ArcGIS-based geospatial visualization.

Switch App 10/2021 – 02/2022
Contractor Software Engineer Brazil – Remote

- Built React and Node.js features for a hospitality recruitment platform with PostgreSQL.

Lucalto 01/2021 – 09/2021
Contractor Software Engineer Norway – Remote

- Built core features with Next.js and Supabase, contributing to the launch of a social platform for tattoo artists.

Selected Project

Wish Apply

AI Career Assistant | Chrome Extension

- Built an AI-powered Chrome extension that analyzes job opportunities and personalizes application content, validated through an undergraduate study that reduced average application time by **36% (12.5 to 8 min)**.
- Designed specialized AI agents for job-fit analysis, CV tailoring, and contextual application Q&A, using **RAG** over candidate profiles and CV data to ground generated content in verified experience.
- Designed structured **MCP** and tool-calling workflows enabling specialized agents to retrieve contextual data and execute tasks through controlled interfaces.

Education

B.S. in Software Engineering – UNINTER
